ILLUMINATED CANVAS

Timeless is how your pictures appear on the illuminated canvases from my studio. Let yourself or your loved ones be photographed by me and be magically transformed onto canvas, or simply send me your best picture. Experience a magical moment.

What is an illuminated canvas?

An illuminated canvas is a work of art, a precious one-of-a-kind, a personal experience, a moment of timelessness, a laterna magica, an extraordinary spatial sensation and aesthetic experience.

An illuminated canvas is unique, hand-crafted, luminous, surprising and metamorphic.

I put you, your loved one, or your favourite photo in the best light, as your image is immortalised on canvas with this technique that I have developed. With backlighting the picture appears like a rich painting on the canvas. The canvas is illuminated by an independent and therefore replaceable fluorescent tube.

I transform your portrait into a vivid work of art that goes far beyond what a photographic print can convey. Let me take your picture, or send me your favourite picture of yourself, your family or your pet too.

Only select materials are used to create my works

Photo sitting

First of all I take your photo digitally in a unhurried sitting.

Following that, we select a picture together and within a fortnight I create your illuminated canvas

The shoots take place either in my studio in Prenzlauer Berg, Berlin, or at a place of your choice. That could be at your home, outdoors, in a museum or at sport. What is important is that the context suits you and it is somewhere you feel at ease. My travel costs within Berlin are free of charge.

I take my time to ensure we capture a sophisticated photo of you that you are very pleased with.

Do you already have a great picture that you want to turn into a unique work of art?

Then send me the picture either as a print or in digital format and I will create a luminous one-off piece!

I am happy to help you select the most suitable size format.

Horses

Want to immortalise your champion on an illuminated canvas? Together we will pay him or her a visit. Depending on the location, that could be in the arena, at vaulting, or in the paddock. I can also accompany you to a special equestrian event and photograph you in competition, finding the best angle and the right moment.

And I'll pull out all stops to get a picture of your equine friend with an attentive gaze and pricked ears. I will assist you in the selection of photos, from which a picture of light and canvas will be created, one which you wouldn't want to be without!

Portraits of Adults

My sittings are all about relaxed simplicity.

Without the pressure of time we can find the right ambience and put you in the best light, be it in the studio, at home, in the park, in a museum or at work. My travel costs within Berlin are free of charge.

Following the sitting we can choose the best picture in collaboration, which I will then transform into an illuminated canvas. Your picture appears when the light is turned on.

Portraits of Children

The photo shoot is all about creating fun for kids. We will take wonderful snaps of your little angel, in a relaxed manner and preferably in familiar surroundings. That could be in his or her room at home, at kindergarten or in the playground, or wherever it is your child happens to be at ease. You are of course welcome to come to the studio in Prenzlauer Berg, Berlin if you prefer.

[More Portraits of Children](#)

Pets

Create a little monument to your companion. They have earned it! Some for their unconditional love and affection, some for their hard-won medals, others for their rapport with the kids. Some for their service on the hunt, for keeping watch and being on guard, others for nothing more than just being there! As well as countless other reasons...

An illuminated portrait is an impressive memento of an old friend who has perhaps already departed.

Nudes

Want to immortalise your body as an illuminated canvas? My pieces oscillate between revealing and concealing, bathing your body in the ideal light. You will be surprised and look at yourself from a completely different perspective. We can take your pictures both in the studio as well as in a more familiar setting.

Following the photo shoot I will assist you with the selection of images, which I will transform into a canvas over the next fortnight. Your timeless image appears when you turn on the light, creating a magical atmosphere. When the light is turned off all that is visible is the blank canvas, with no clue as to the treasure hidden beneath.

Ordering Information

1

I would be pleased to advise you with regard to choosing the style and size of your portrait. Either we can arrange a one-on-one photo shoot or alternatively send me your photo to be used as the template.

2

Please confirm your order in writing by fax or post using the order form. For orders over €500 a deposit is required.

3

I will take your portrait at the place of your choice. I will assist you with the selection of the image with the help of my laptop directly thereafter. The final selection can take place later by phone if required.

4

The illuminated canvas will be completed within approximately two weeks of either receipt of the template photo, or from when the photo is selected, as the case may be.

5

Either collection in person or delivery are both available.

6

Payment terms: remittance of the agreed fee within 10 days of receipt of the canvas
